DETAILED ACTION

Claim Rejections - 35 USC § 102/103

1. Claims 24-40 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP35719192A (Yamazaki et al.).

Yamazaki teaches a graphite crucible having a porosity of 5 - 30% as measured by an Hg porosimeter (See abstract). With regard to the claimed permeability when measured to the DIN Standard 51935, it is expected that the disclosed graphite crucible will exhibit this property since it is of the same composition as claimed by applicant.

It has been held that where the claimed and prior art products are identical or substantially identical in structure or are produced by identical or a substantially identical processes, a prima facie case of either anticipation or obviousness will be considered to have been established over functional limitations that stem from the claimed structure. *In re Best*, 195 USPQ 430, 433 (CCPA 1977), *In re Spada*, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990). The *prima facie* case can be rebutted by evidence showing that the prior art products do not necessarily possess the characteristics of the claimed products. *In re Best*, 195 USPQ 430, 433 (CCPA 1977).
